Primošten, 2.2.2022

Čebelarska Zveza Slovenije uputila nam je dopis za podršku i suradnju:

Dragi, **svjetskom sadnjom medonosnih biljaka za pčele**, koje su oprašivači na našem planetu, pridružuje se sve više zemalja, organizacija i pojedinaca. Pridružite nam se pismom podrške na adresu nocb@czs.si i konkretnom akcijom - sadnjom medonosnih biljaka u ožujku. Svaka posađena medonosna biljka pridonosi uspješnosti projekta. Mi ćemo uspjeti zajedno!

Hvala Bostjan Noč

Poštovani,

čestitamo i divimo se vašoj sposobnosti da dobre ideje dignete na svjetski nivo. Od nas imate apsolutnu podršku. Uključit ćemo se u uzgoj i sadnju medonosnog bilja jer je to naša dugogodišnja tradicija u radu sa djecom.

OPRAŠIVAČI NA PROZORIMA STARAČKOG DOMA

Davno smo u centru Zagreba na negodovanje susjeda imali pčelinjak. Sa njihovom djevojčicom sadili smo medonosno bilje i „sokićem“ kroz metalnu mrežu pojili pčele u AŽ košnici. Njeno oduševljenje našom „igrom“ je prešlo i na roditelje. Posađene biljke podijeli smo stanovnicima Doma za starije osobe Maksimir. Nedavno, u dugotrajnoj karanteni korone, pčele i drugi oprašivači bili su im na prozorima jedini posjetioци i veselo i zabavno društvo.

UZGOJI DALMATINSKU BILJČICU ZA PRIMOŠTENSKU PČELICU

Animirali smo djecu iz Primoštena na uzgoj medonosnog bilja. Reznicu biljke smo očistili od suvišnog lišća i umočili u med. On ju je dezinficirao, nahranio i potakao na rast. Djeca su ju ukopala u zemlju i njegovala. Uzgojene biljke su na dan Svete Luce poklonila bližnjima.

The »Bee Forage Planting Day 2022« will soon be here.

Lukovica, 17. 2. 2022

In November 2021, the Beekeeping Association of Slovenia has presented the project of planting honey trees and plants called »Bee Forage Planting Day«, which is now well underway. During this time, more than 100 supporters from 21 different countries have joined to support the project and will be planting honey trees and plants this year.

With the generous help of our sponsors and donors, we have been able to collect 19.310 bee forage plants for the planting so far. Until 26th March, we hope to double this number. We would like to thank all the participants that have joined us in the efforts to help our nature.

The “Bee Forage Planting Day” activities will take place next month, on 26th March. Each of us will have the chance to join the planting activities on one of the locations organized by the Slovenian Forest Service or to join the local Beekeeping Societies, which will also be planting honey trees and plants. You can also join the project individually by planting bee forage plants at home – in the garden or in the pots. By doing something positive for nature, the bees and other pollinators will repay all our work with their efforts at pollination during this year.

For more information about the project, its sponsors, donors, supporters, etc., you can visit the website: <https://www.czs.si/content/dansajenja>.

We would like to invite you to join us on Bee Forage Planting Day, either by participating and planting honey trees and plants on one of the locations or as partners, supporters or donors of the project. Let's do something positive for the nature!

Slovenian Beekeepers' Association
